Announcing JD Edwards EnterpriseOne Tools Release 9.2.5.4

Enhancements   Product Catalog

What are we Announcing?

Today we are announcing the availability of EnterpriseOne Tools Release 9.2.5.4, which supports EnterpriseOne Applications Release 9.2. Oracle JD Edwards continues to invest in digital transformation, user experience, system automation, security, and open platforms by delivering Tools Release 9.2.5.4.

Combined, these JD Edwards Tools and Applications enhancements empower companies on their business transformation journey.

Tools Release 9.2.5.4

JD Edwards Product Strategy
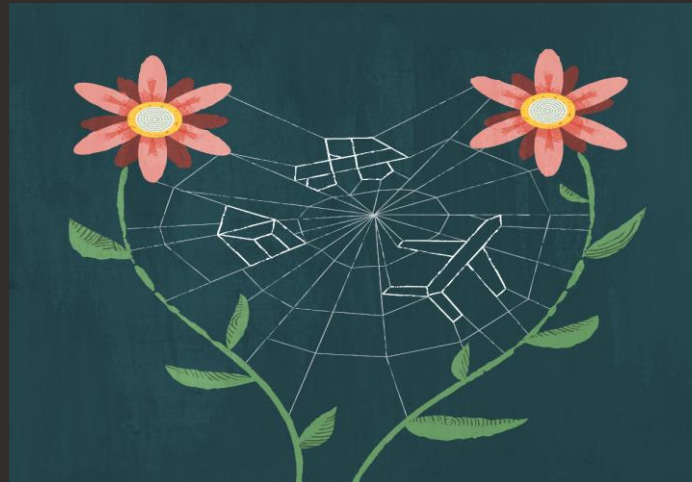

Optimize, Transform and Automate your JD Edwards

Application Optimization

- Protect your Business
- Improve your Business
- Future proof your Business

Digital Transformation

- Process Automation
- Low/No code UI
- Enterprise Integrations

System Automation

- Efficient Run and Maintain
- Enterprise Class Infrastructure
- Continuous Innovation

Application Optimization

JD Edwards – Application **Optimization**

Protect Your Business

Enable legislative and regulatory compliance for global, country, local and industry specific requirements.

Improve Your Business

Address business and user pain points by digitizing business processes and simplifying user experiences.

Future Proof Your Business

Joint Venture Management	Learning Path - VBCS and Orchestrator for Mobile

Requirements Planning Summary & Supply/Demand Console

Interactive Staff Utilization for Maintenance	Real-Time Sales advisor

Enjoy A Faster Financial Close with JD Edwards 9.2

Improved Auditability, Interactive Reconciliation, Performance, Notifications and More

UX: Real-Time Summarization of Account Ledger totals eliminates need to go to last row for totals

Simplify: More informative Cash Basis Error Messaging Enables Faster Resolution

Simplify: 9.2 Interactive Reconciliations are more than 50X faster!

UX: Improved reconciliation report provides positive confirmation when all transactions are reconciled

Business Activity → **Capture Accounting** → **Review and Post** → **Reconcile and Close** → **Generate Reporting**

UX: Role-Based Pages for accountants highlight key operational indicators and simplify user experience

Automate: G/L Batch Status History strengthens segregation of duties compliance and improves financial controls

Automate: Preconfigured Notifications drive awareness and reduce time to action

Simplify: One View Financial Statements provides end-user driven financial reporting
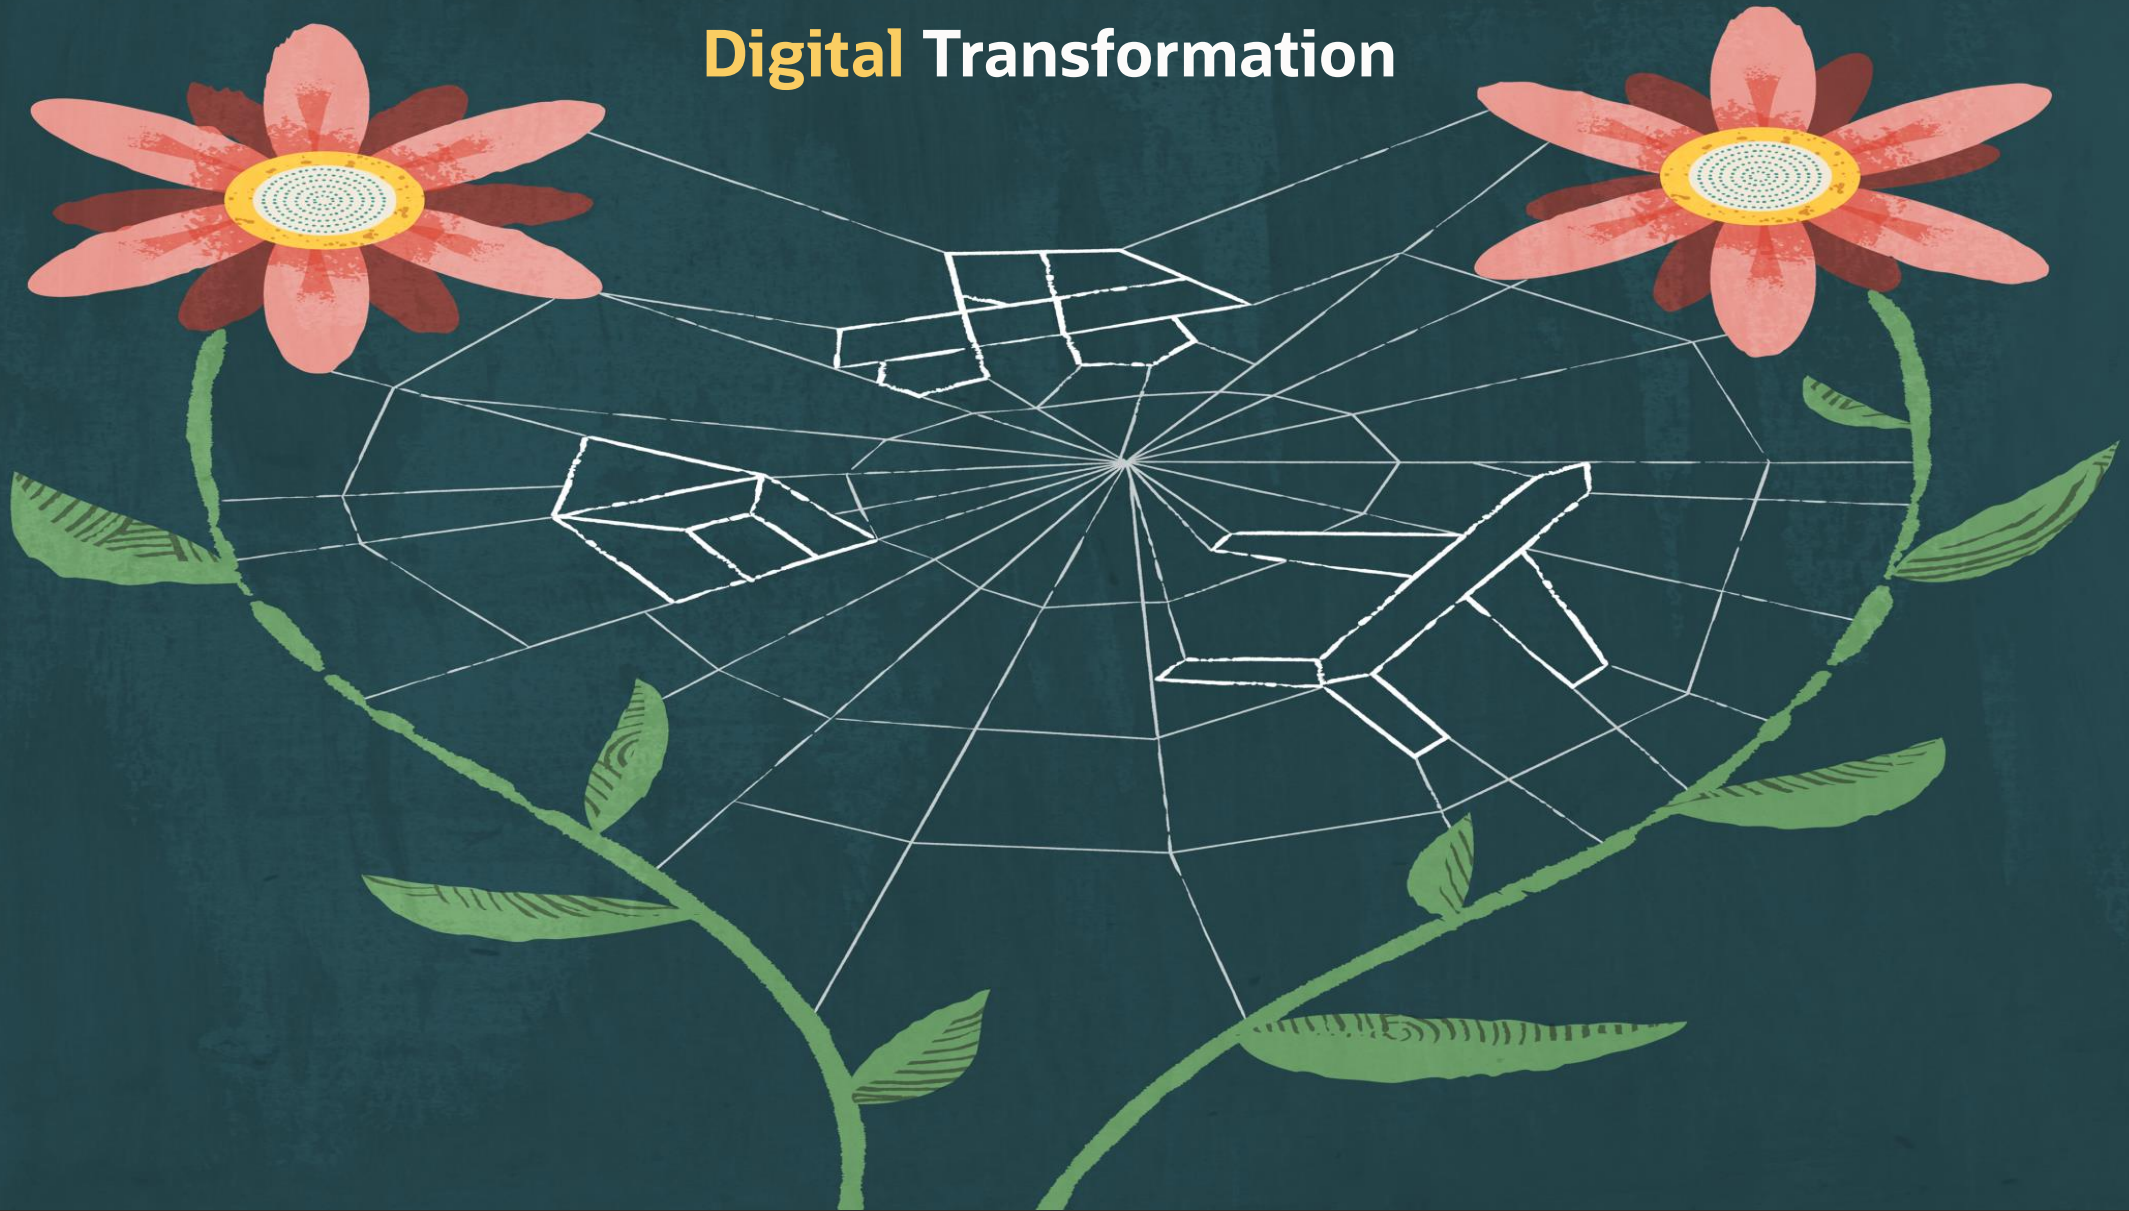

Embedded Analytics

✓ Intelligent UX

✓ Machine Learning

✓ Improved Decision Making

✓ Driving business efficiencies

✓ Creating competitive advantages

Digital Transformation

JD Edwards – Digital Transformation
Transform your business with JD Edwards Digital Platform

User Experience

Streamline the traditional user interface and extend to digital experiences such as mobile and chatbots

Process Automation

Compress process cycles, eliminate manual steps, and reduce human errors

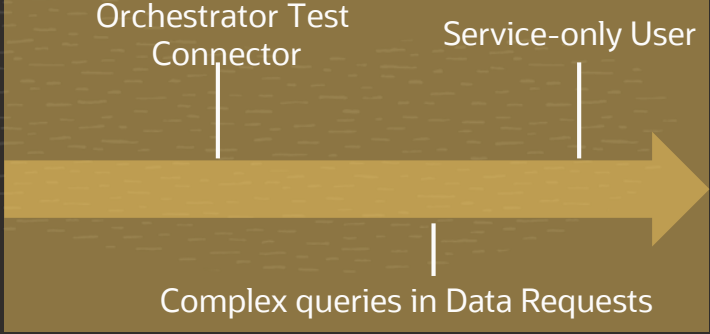

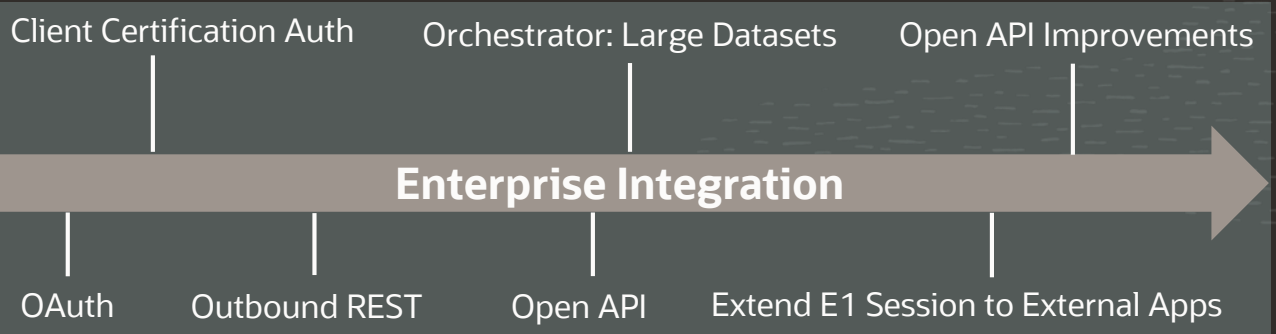

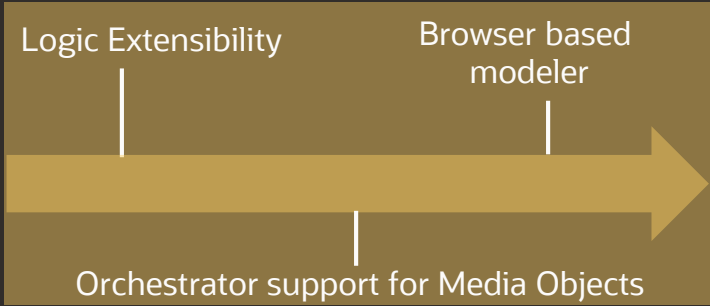

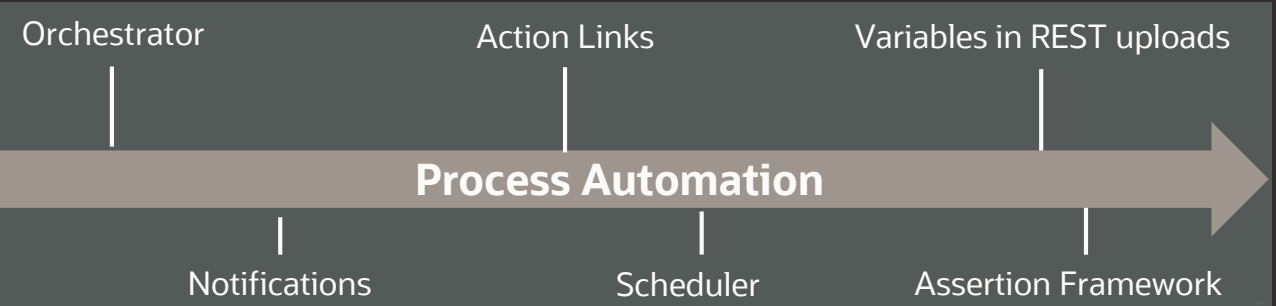

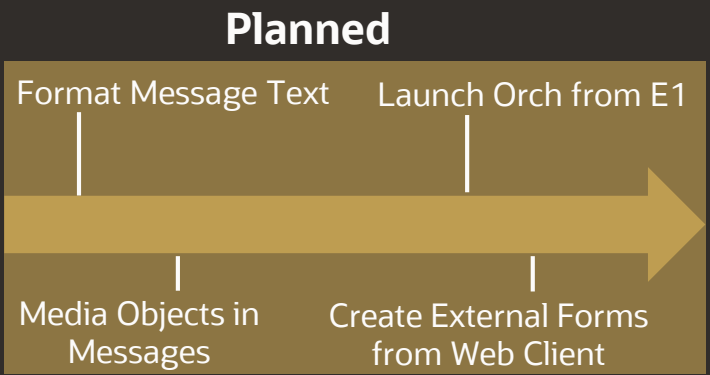

Enterprise Integration

Differentiate your business process and deliver end-to-end process excellence across your enterprise

Rapidly respond to new requirements and opportunities without costly customization
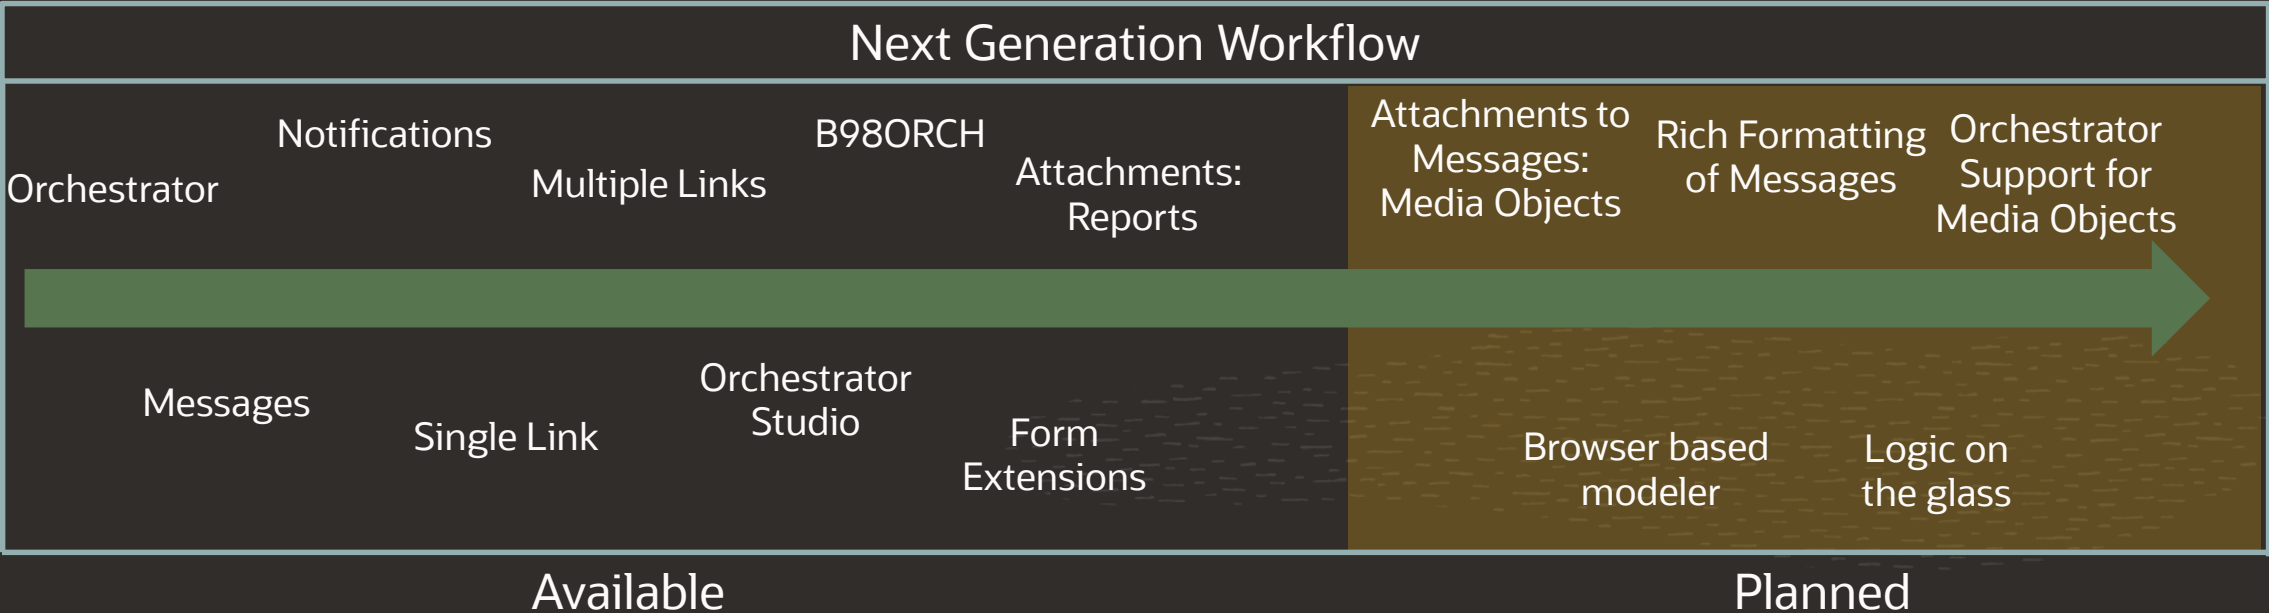

EnterpriseOne Features – Digital Platform

Available

Planned

User Experience

Form Personalization | Keyword Search | Enhanced E1 Search

Form and Data Extensions | Mark Required Fields | Show Hidden Fields

Format Message Text | Launch Orch from E1

Media Objects in Messages | Create External Forms from Web Client

Process Automation

Orchestrator | Action Links | Variables in REST uploads

Notifications | Scheduler | Assertion Framework

Logic Extensibility | Browser based modeler

Orchestrator support for Media Objects

Enterprise Integration

Client Certification Auth | Orchestrator: Large Datasets | Open API Improvements

OAuth | Outbound REST | Open API | Extend E1 Session to External Apps

Orchestrator Test Connector | Service-only User

Complex queries in Data Requests

Evolving to Next Generation Workflow
Rapid time to value by empowering business analysts

- Enable creativity at the "point of process" for rapid time to value.
- Improve operational efficiencies
- Reduce the technical requirements and skill set required to build automated processes

Next Generation Workflow		

Orchestrator   Notifications   Multiple Links   B98ORCH   Attachments: Reports   Attachments to Messages: Media Objects   Rich Formatting of Messages   Orchestrator Support for Media Objects

Messages   Single Link   Orchestrator Studio   Form Extensions   Browser based modeler   Logic on the glass

Available   Planned

1 + 1 > 2

Low Code / No Code

✓ No specialization needed, very easy to learn

✓ Less code to write, helps innovate faster

✓ Rapid delivery, Acceleration of speed to market

✓ Address business requirements with minimal cost

✓ Attract and retain top talent with innovative culture

System **Automation**

JD Edwards – System **Automation**
Increased Innovation at a Lower TCO

Enterprise Class Infrastructure

Enterprise Class infrastructure at a lower cost than On-Premises

Efficient Run and Maintain

Automate common IT activities to deliver the highest quality of service

## Continuous Adoption

Easily stay current to leverage new capabilities to transform business processes

EnterpriseOne Features – System **Automation**

Available   **Planned**

| One-Click Automation | Reference Architecture | Elasticity Document: Auto-Scale | | Elasticity: Auto-Scaling |

Enterprise Class Infrastructure

| On-Prem to Cloud Migration | Upgrade JDE to Cloud target | Autonomous DB | | Improved DB Pooling | Kernel Reconnection |

| User Defined Object LCM | Virtual Batch Queues | Web enabled OMW | | Automated Package | Zero Downtime Deployment |

Efficient Run and Maintain

| REST enabled Server Manager | Dev Client Simplification | | Offline Monitoring and Notification |

| Simplified Upgrade | Form Extensibility | | Upgrade to 64-bit Target | Update Manager |

Continuous Adoption

| Object Tracking with Impact Analysis | De-customizer | | Automated Testing Framework |

Removing Barriers to Continuous Adoption
Implement product innovation without business disruption
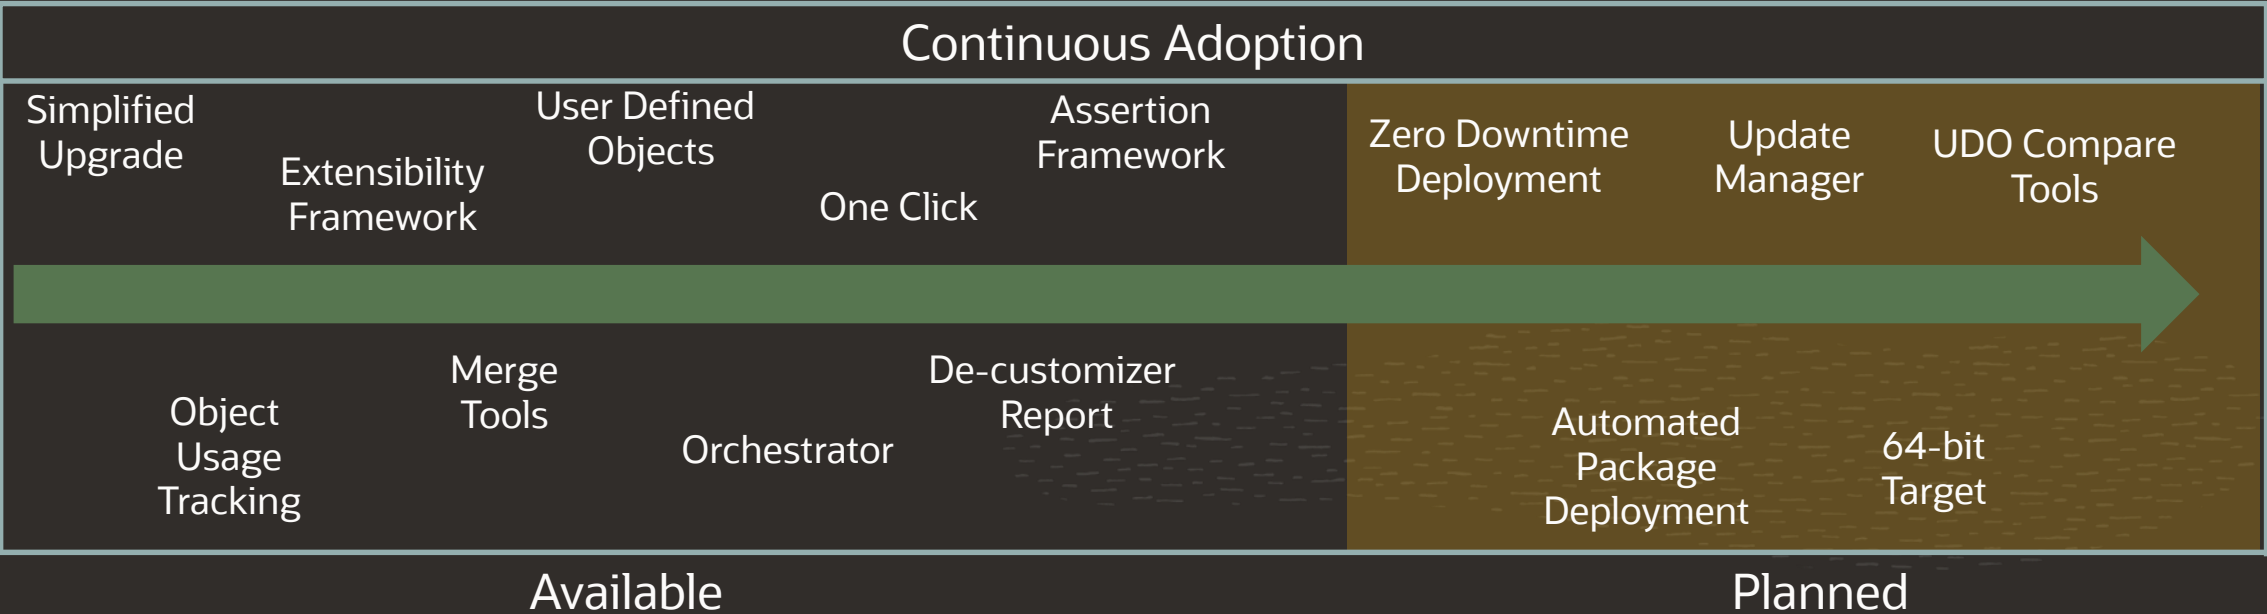

- Pivot to meet dynamic and changing market demand
- Adopt new and industry leading technology to gain competitive advantages
- Further business and IT partnership to drive innovation

Continuous Adoption		
Simplified Upgrade, Extensibility Framework, User Defined Objects, One Click, Assertion Framework	Zero Downtime Deployment, Update Manager, UDO Compare Tools	
Object Usage Tracking, Merge Tools, Orchestrator, De-customizer Report	Automated Package Deployment, 64-bit Target	
Available	Planned	

System Managing the System

✓ Rapidly meet dynamic business requirements

✓ Enable IT and business partnership

✓ Optimized to drive business efficiencies

✓ Automate costly processes

Customer Success with JD Edwards

Integration to Oracle CPQ, CEC; Process Automation	Integration to MES; Accounting "Bot"	Alternative User Interface with React	Integration with Artificial Intelligence Lease Repository	Runs JDE on Oracle Cloud Infrastructure
Glesby Marks	**STANLEY** Engineered Fastening	**LEDCOR** GROUP	**CARR** PROPERTIES	**CIRCLE K**

VARO	**CISNE**	CHARCUTERÍA **NOEL** · DE TODA LA VIDA ·	**PennEngineering**®	**VH** VAN HESSEN
Automated Asset Tracking through IoT	QR Code Reading; Manufacturing Automation	Decision making and task optimization using UX One Roles	Automated Part Creation; Data Integrity	Mobile Warehouse Management Application
