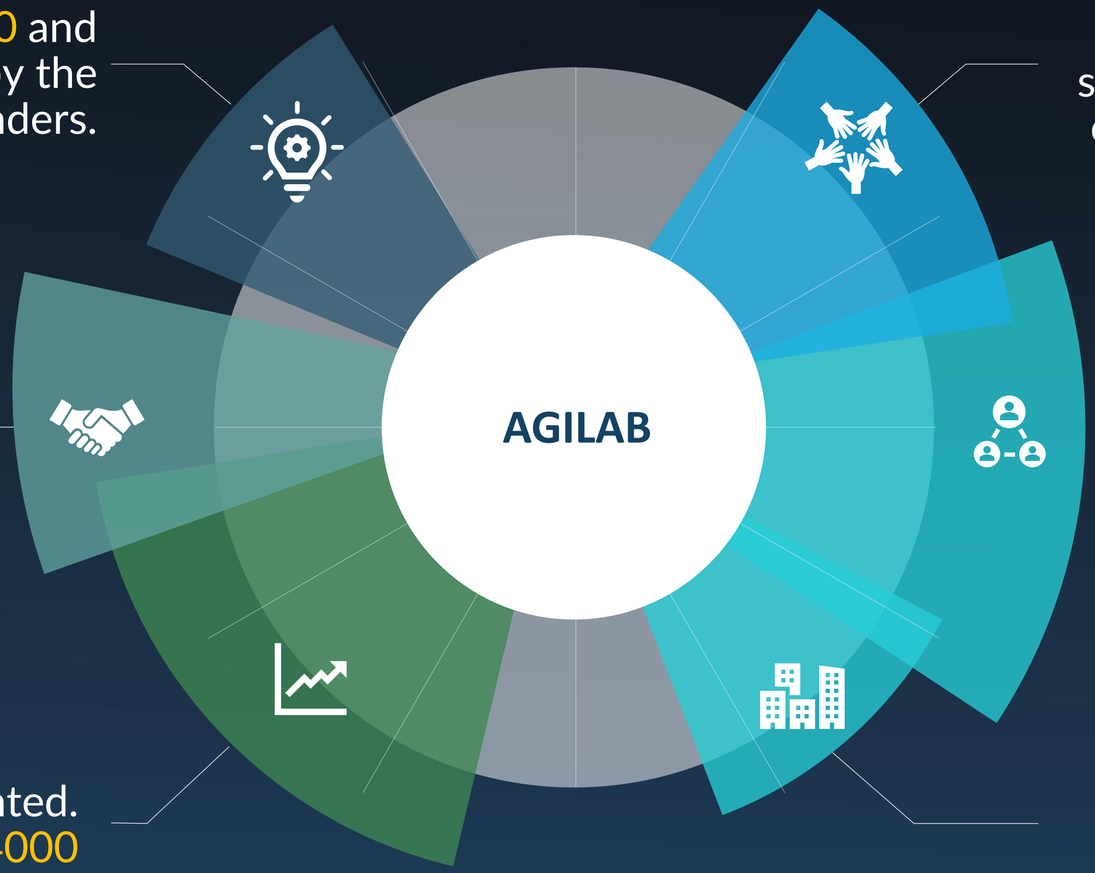
Company Overview

AgiLab is founded in 2010 and privately-owned company by the founders.

1st AgiLab app available in 2011
AgiLab platform released in 2016

We are customer-oriented. AgiLab currently has >4000 active users and our customer retention rate is at 100%.



AgiLab is headquartered in Paris. We have a core team (France, UK) supplemented by preferred partners to enable us to scale rapidly and provide global reach.

Our team members have an average of 15+ years of prior experience or operational expertise in laboratory informatics systems.

We have partner offices globally, providing professional services in Europe, North America, Asia

AgiLab Mission and Culture

Why

We believe in accelerating the pace of digital transformation for laboratories by providing flexible and compliant software that users want to use.

How

We help laboratories to become more efficient and support processes from R&D, QA/QC through to manufacturing.

What

We offer a Unified Digital Platform for laboratories in a single enterprise-ready system.

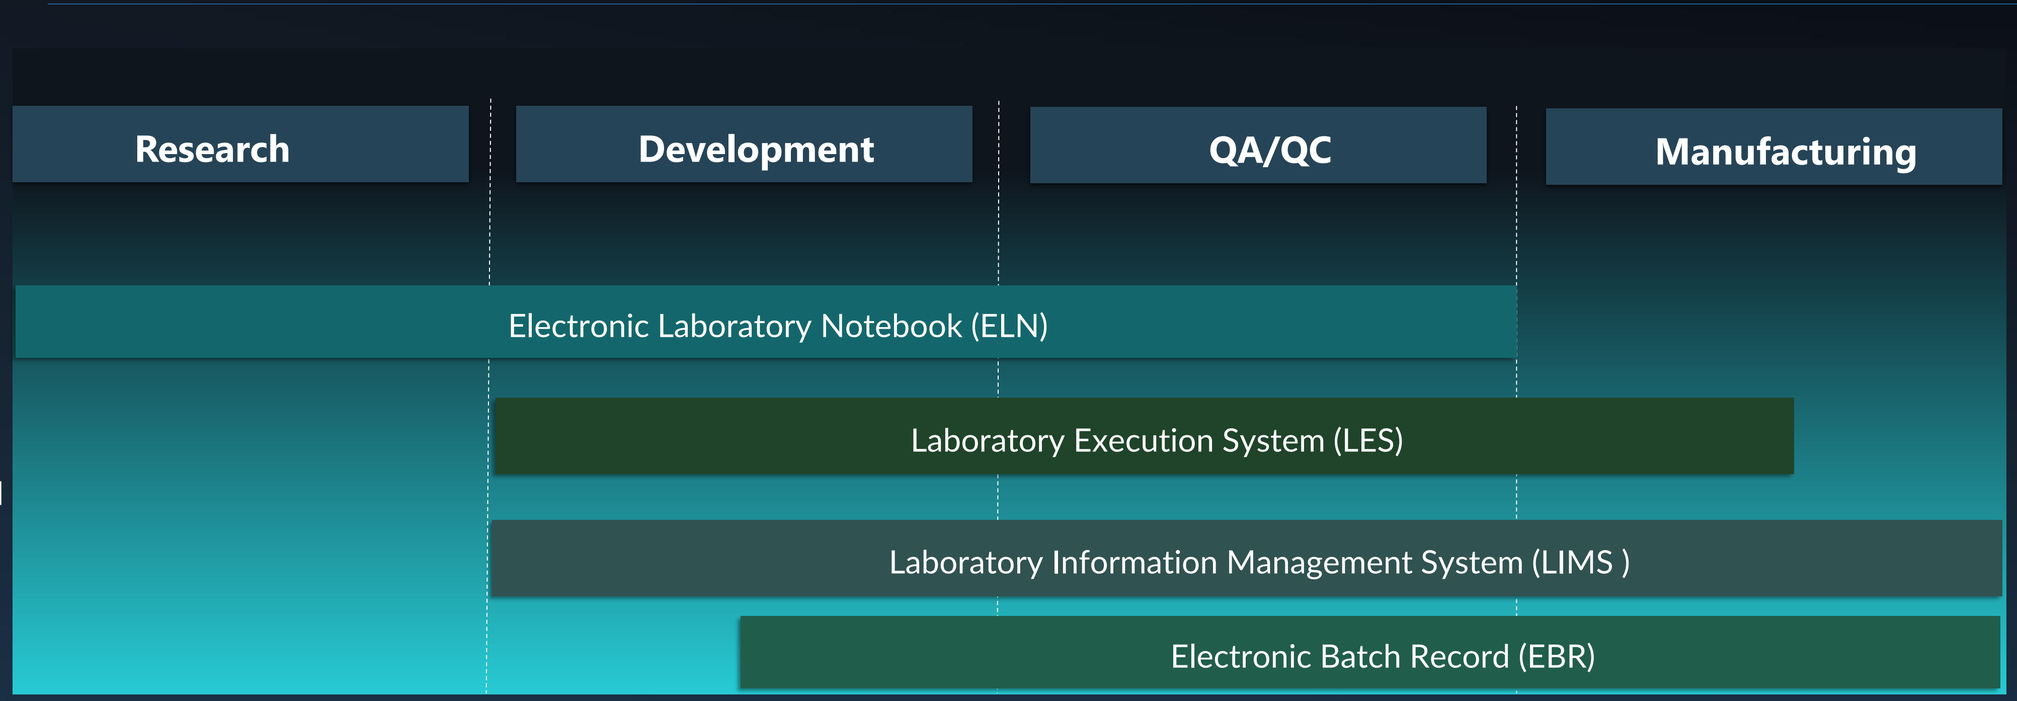
AgiLab Platform Foundation and Applications



ORACLE **Database Services - APEX**

SaaS | Cloud | On-premise | Advanced Analytics

© AgiLab / Confidential - All rights reserved

Powered by Oracle Technologies

Enable laboratory digital transformation by a proven, robust and secure technical framework

Oracle APEX

- No-cost fully supported Oracle database feature
- Included with all editions of Oracle database
- Maintained, supported and improved by oracle
- Easy to install and upgrade
- Can be deployed on-premise or cloud

© AgiLab / Confidential - All rights reserved

Adaptable and Configurable System

The AgiLab platform can be used out of the box or configured to adapt to your lab process

Data definition

Master Business Data:

- Process Steps
- Process operations
- Parameter groups
  Parameters
- Calculations
- Static lists
- Templates

Configuration

Screen Configuration:

- Additional fields
- Business rules
- Reports
- Labels
- Dashboards

Integration

Systems Integration

- Third-party interfaces
- Specific configuration
- Web Services
- Rest API

Key benefits of AgiLab platform

Modern

Drive data management through Next-generation applications connected in a common platform

Adaptable

Extend existing applications and integrating with other technologies on a flexible, scalable, and secure low-code framework powered by Oracle APEX

Intelligent

Achieve greater return on investment with built-in capabilities by leveraging the power and flexibility of Oracle technologies

Unified

Unify processes and remove reliance on paper, legacy systems and office applications through a single user interface
